PROFESSIONAL EMPLOYMENT

Michael Baker International, 2004-2009 & 2010- 2015. Project / Planning Manager

Planning Manager responsible projects located in California. Managed staff and budgets in multi-disciplinary/multi-stakeholder environment for a variety of federal, local and municipal clients.

Currently, serves as a Production and Technical Services (PTS) contractor employee to FEMA Region IX for the Risk Mapping, Assessment and Planning (Risk MAP) program. In this capacity, provides support to FEMA for aspects of implementing Risk MAP public outreach and stakeholder coordination. Examples of this work can be found at www.r9map.org

Vernadero Group, Phoenix, AZ. 2009-2010 - Planning and Engineering Manager

Planning and Engineer Manager responsible projects located nationally and worldwide. Managed Geographic Information Systems (GIS), Environmental Planning and Engineering, Landscape Architecture, Land Development, Engineering and Master Planning projects. Managed staff and operational budgets to optimize clients return on investment. Oversaw daily operations and managed technical writing, special projects, marketing and other leadership within the company. Developed quality control, design review and technical approaches for planning and engineering projects.

Arizona State University, Tempe, 1998-2004 Arizona. Project Management Assistant / Space Planner.

Provide drafting/CADD, GIS, database, and design support for professional planning staff, architects, and administrative staff. Drafted space plans, facility layouts, and planning studies as directed by staff architects/campus planners. Designed room layouts and report on feasibility of improvement projects and space plans under supervision of architects. Produced presentation drawings for projects using Photo Shop, Illustrator and AutoCAD. Produced GIS database linked plans for space planning, backfill, and new construction projects. Produced graphic GIS plans linked to databases showing a graphic record of existing and planned. Created database reports for space planning decision support. Help maintain the campus space database inventory records. Produced architectural drawings and administered contracts with in-house services and outside contractors and consultants. Provided move and coordination support for new and relocated tenants; including infrastructure connection logistics. Conduct building walk-throughs and report on current facilities and recommend change to planning team. Assist management in identification of problems in current and future needs.
